COMPANY PROFILE

Mazzonetto spa was founded in 1982 by the Mazzonetto family, in Veneto area which lies in the North of Italy, close to Venice. Ever since its inception, the company has distinguished itself for its manufacturing efficiency and innovative core focusing on roofing field.

Since the company was established 30 years ago, it has set the bar high for other manufacturers in its same sector, becoming a consolidated group with branches in Europe and a constantly expanding international presence.

Since the '90s it has extended its product assortment to metal cladding for building roofs and façades and has created a series of exclusive finishes and special claddings specifically designed for architecture and construction industry. Its high level of specialization in metalworking and its unwavering attention to market developments are the two main factors which have driven its growth process.

ADVANTAGES

1 – LIGHTWEIGHT

Aluminium roof weight is around 2 kg/m². This is 1/10 of a traditional tile roof and less than half of a copper, titanium zinc and prepainted steel roof. Lightness is an advantage for the installer while working on the roof and with rainwatersystem too. In renovating old houses it is not necessary to reinforce the old roof understructure saving money and time.

2 – MALLEABLE & EASY TO WORK WITH

Aluminium alloy is very flexible and ductile. VESTIS H41 hardness is the ideal metal to be used in double standing seam installations. Moreover it can be worked without breakage at low temperature, even under 0 °C.

3 – LONG TIME RESISTANT:

RUSTPROOF: aluminium protect itselfs from rust with a self-protective layer.
SEVERE ATMOSPHERICAL CONDITIONS RESISTANT: with 35 microns of high durability polyester coating on the front face, the material is very well protected by storms, snow and strong UV rays too. Indeed Vestis is warrantied even if installed over 900 m of altitude.
25 microns of high durability polyester on the back face ensure gutters longer life while roof and facade are protected from the contact with other materials.

4 – DESIGN & CREATIVITY

Aluminium ductility gives the opportunity to create any shape without limitation to the architectural creativity. Available in 15 colors and 2 different surfaces, it can be combined with traditional and modern buildings, according to everyone's preferences.

5 – COMPLETE LINE

VESTIS is presented with a complete line of roofing accessories and rainwater-system.

6 – ECOLOGICAL & RECYCLABLE

Aluminium is 100% recyclable and atoxic.

7 – WARRANTY

VESTIS is 40 years anti-corrosion and color warrantied for a long-lasting life. Warranty is automatic and it covers both coils and rainwater-system.
